# Project X - User Tests

## Usability Test Plan: Quiz

**PRODUCT UNDER TEST**
The main feature of our website: the quiz functionality. This feature allows users to test their knowledge of the South Korean girl group aespa.

**TEST OBJECTIVES**
The goal is to determine if users can easily understand how to start and complete a quiz.

- Can users find the quiz section?
- Can they begin a quiz without assistance?
- Do they complete the quiz and understand their results?

**TEST TASKS**

1. Navigate to the quiz section.
2. Start the quiz.
3. Complete all quiz questions.
4. Submit the quiz and view results.

**TEST RESULTS**

The user completed multiple quizzes, all of which were completed successfully. The user had no complaints about the UI—elements were where they were expected to be and functionality was complete.

However, when the user changed their profile picture for the second time, the avatar did **not** update on the leaderboard. This was identified as a bug, and the cause was immediately understood and fixed shortly after.
